

TIANNENG LITHIUM BATTERY

7.5A Max. DZ36N-7.5ES

Li-ion Battery User Manual

36V7.5Ah	0°C ~ 35°C	-10°C ~ 45°C
Model specification	Charging environment temperature	Discharge environment temperature
< 80%RH	0°C ~ 30°C	30% ~ 70%
Environment humidity	Long-term storage temperature	Long-term storage of electricity

Warning

1. Please use the battery in the recommended environment and store it for a long time to ensure the normal life of the battery. It is strictly prohibited to charge the battery below 0°C.
2. It is strictly forbidden to put the battery in acidic, alkaline, salty liquid or water to avoid rain and water.
3. It is strictly forbidden to place the battery in a high temperature environment, such as heating, near a fire source or sun exposure.
4. It is strictly forbidden to reversely connect or short-circuit the positive and negative poles of the battery, and it is strictly forbidden to damage or disassemble the battery.
5. It is strictly forbidden to charge indoors, corridors or confined narrow spaces. Use the original lithium battery charger when charging, and the charging time should not exceed 7-8 hours.
6. When the battery is not in use for a long time (more than a week), please disconnect the battery from the vehicle and ensure that it is charged once every three months so that the battery is stored in the best storage capacity.
7. The battery should be prevented from being pierced by sharp objects, dropped, or squeezed by strong stress to prevent leakage, heat generation, smoke, fire or explosion of the battery.
